PROFESSIONAL SUMMARY

Performance-driven **Senior Software Engineer** with **8+ years of experience** architecting, scaling, and optimizing high-throughput web applications, automated data pipelines, and enterprise e-commerce platforms. Expert in translating complex wireframes and system specifications into high-performance user interfaces using **React, TypeScript, and Tailwind CSS**. Proven track record of designing robust **Node.js** backend architectures, structuring optimized relational data schemas, and deploying advanced **GraphQL/REST API gateways** to eliminate platform constraints and maximize infrastructure efficiency.

TECHNICAL SKILLS

- **Core Languages:** TypeScript, JavaScript (ES6+), PHP, HTML5, CSS3, Liquid (Shopify)
- **Frameworks & Libraries:** React, Next.js, Vite, Node.js, Svelte/SvelteKit, Express, Tailwind CSS, Sass/Less
- **Data & Cloud Architecture:** GraphQL, REST APIs, Amazon S3, Custom Content Modeling, Relational Database Design
- **Tools & Ecosystems:** Git/GitHub, Figma, Webpack, Core Web Vitals, Google Tag Manager (GTM), WordPress, Agile/Scrum

WORK EXPERIENCE

SENIOR WEB DEVELOPER

TCWGLOBAL (CONTRACT) | JANUARY 2020 TO PRESENT

- Engineered an automated data-migration pipeline and custom backend service in Node.js utilizing Cheerio and Axios to extract legacy HTML data schemas, securely streaming payloads to Amazon S3 via REST/GraphQL API endpoints.
- Bypassed severe Shopify API platform memory caps (50-item retrieval ceiling) by engineering custom Liquid sub-pagination loops, unlocking seamless data rendering for 100+ documents on a single-page view.
- Implemented a client-side JavaScript sorting engine leveraging Regular Expressions to dynamically parse data, automatically enforcing a strict chronological descending presentation layer.
- Designed a scalable relational database architecture utilizing nested content modeling constraints, successfully mapping complex object dependencies and reducing platform overhead.
- Optimized public-facing marketing assets and site performance metrics (Core Web Vitals), accelerating mobile Largest Contentful Paint (LCP) and boosting baseline storefront conversion rates (CRO) by an estimated 40%.
- Championed SDLC best practices via GitHub for collaborative version control, establishing engineering team standards for peer code reviews, rigorous testing workflows, and structured branch management.

FREELANCE FRONT-END DEVELOPER

PONY RESCUE CLUB WEBSITE REDESIGN | MARCH 2026 – AUGUST 2026

- Designed and architected a responsive, 7-page web application architecture for a local community equestrian ranch, focusing on intuitive user journeys and local brand visibility.
- Engineered a seamless cross-device layout utilizing advanced CSS layouts (Grid/Flexbox) to transform a high-density, multi-column desktop layout into an accessible, single-column mobile dashboard stack.
- Optimized typography hierarchy and visual contrast across media-heavy components, ensuring strict adherence to WCAG accessibility guidelines over dynamic background hero imagery.
- Collaborated directly with clients to refine informational architecture, mapping complex safety regulations and operational constraints into intuitive, user-friendly informational cards.

WEB DEVELOPER

UPGROW INC (FREELANCE) | JULY 2021 TO AUGUST 2021

- Built highly responsive landing pages utilizing HTML5 & CSS3 Flexbox/Grid, significantly enhancing the mobile user experience across diverse modern devices.
- Developed custom HTML emails for the Salesforce platform utilizing modular HTML & CSS, increasing cross-client email compatibility and deliverability metrics by 35%.

SENIOR WEB DEVELOPER

TEA COLLECTION | FEBRUARY 2017 TO JANUARY 2020

- Collaborated remotely across distributed teams of project managers, designers, and marketers via Slack and Figma to transform high-fidelity wireframes into highly responsive web components and high-converting customer acquisition funnels.
- Developed A/B testing variations and implemented Google Tag Manager (GTM) tracking to isolate user friction points, using performance data to drive multi-brand conversion rate growth by 45%.
- Championed engineering best practices via GitHub for remote, multi-functional collaboration, establishing sustainable team standards for peer code reviews, asynchronous mentorship, and structured branch management.

WEB DEVELOPER (APPLEONE CONTRACT)

SAMTRANS & CALTRAIN | JUNE 2016 TO DECEMBER 2016

- Managed daily CMS web operations, technical SEO markup implementations, and core technical functions for transit web properties, ensuring maximum platform uptime and search index visibility while serving as the primary technical point of contact.
- Coordinated the technical integration of complex Web Service projects (including GTFS static/real-time transit data sets) between the District and the MTC/511 Transit Data Manager system, streamlining regional data flows.
- Built production-ready web pages directly from visual design comps by coding structured, highly responsive HTML, CSS, and JavaScript.

WEB DEVELOPER (AQUENT CONTRACT)

COST PLUS WORLD MARKET | MARCH 2015 TO NOVEMBER 2015

- Deployed responsive HTML, CSS, and JavaScript updates across primary e-commerce web platforms, corporate sites, and blog channels.
- Architected and customized enterprise WordPress frameworks by writing sustainable PHP server-side code and custom CSS/JS overrides designed to support backend integrations and survive core platform updates.
- Mastered enterprise CMS tools (MarketLive platform) to build, arrange, and deploy complex interactive page layouts and promotional assets.

EDUCATION

WEB DEVELOPMENT CERTIFICATION

Seattle Central College

2014
