PROFESSIONAL SUMMARY

Performance-driven **Senior Software Engineer** with **8+ years of experience** architecting, scaling, and optimizing high-throughput web applications, automated data pipelines, and enterprise e-commerce platforms. Expert in translating complex wireframes and system specifications into high-performance user interfaces using **React, TypeScript, and Tailwind CSS**. Proven track record of designing robust **Node.js** backend architectures, structuring optimized relational data schemas, and deploying advanced **GraphQL/REST API gateways** to eliminate platform constraints and maximize infrastructure efficiency.

TECHNICAL SKILLS

- **Core Languages:** TypeScript, JavaScript (ES6+), PHP, HTML5, CSS3, Liquid (Shopify)
- **Frameworks & Libraries:** React, Next.js, Vite, Node.js, Svelte/SvelteKit, Express, Tailwind CSS, Sass/Less
- **Data & Cloud Architecture:** GraphQL, REST APIs, Amazon S3, Custom Content Modeling, Relational Database Design
- **Tools & Ecosystems:** Git/GitHub, Figma, Webpack, Core Web Vitals, Google Tag Manager (GTM), WordPress, Agile/Scrum

FEATURED PROJECTS

ENTERPRISE DATA MIGRATION PIPELINE & CMS ARCHITECTURE | Node.js, GraphQL, Liquid, S3

- **Engineered an automated data-migration pipeline** and custom Node.js backend utility using Cheerio and Axios to programmatically scrape, parse, and stream legacy data schemas and binary payloads directly to cloud infrastructure.
- **Bypassed severe API platform memory constraints (a rigid 50-item retrieval ceiling)** by designing custom Liquid sub-pagination loops, unlocking seamless single-page rendering for 100+ nested documents.
- **Constructed a resilient, error-tolerant storefront interface**, optimizing Core Web Vitals and safely managing dynamic client-side data fallbacks across disparate binary file types (PDF vs. Media Image Wrappers).
- **Implemented a lightweight client-side JavaScript sorting engine** utilizing advanced Regular Expressions to dynamically parse multi-tiered directory schemas and enforce chronological data presentation.

RESPONSIVE COMMUNITY APPLICATION ARCHITECTURE | React, TypeScript, Tailwind CSS, Figma

- **Designed and architected a responsive, 7-page web application** for a local organization, focusing on high-performance user journeys and optimized informational discoverability.
- **Engineered an adaptive, fluid grid system** to transform high-density, multi-column desktop screens into an accessible, single-column mobile dashboard layout without disrupting layout proportion.
- **Optimized typography hierarchy, fluid clamp scaling, and visual contrast ratios** across media-heavy layout nodes, ensuring strict adherence to WCAG accessibility guidelines over dynamic background hero imagery.

WORK EXPERIENCE

SENIOR WEB DEVELOPER (CONTRACT)

TCWGGLOBAL | JANUARY 2020 - PRESENT

- **Engineered an automated data-migration pipeline** in Node.js using Cheerio and Axios to programmatically scrape and parse fractured legacy schemas, securely streaming binary payloads directly to Amazon S3 via the Shopify Files API to reduce manual data operational overhead to zero.
- **Bypassed platform-enforced 50-item API retrieval limits** by designing deeply nested custom Liquid sub-pagination loops, successfully unlocking continuous single-page rendering for over 100+ documents.
- **Built a high-performance client-side sorting engine** utilizing advanced Regular Expressions to dynamically decode complex multi-tiered directory structures, enforcing a strict chronological descending user presentation.
- **Optimized core web vitals and client-side asset delivery pipelines**, dropping Largest Contentful Paint (LCP) times and providing cross-device responsiveness.
- **Established corporate frontend development standards** by authoring branching strategies, maintaining strict type safety guidelines, and driving rigorous technical code reviews via GitHub.

WEB DEVELOPER (FREELANCE)

UPGROW INC | JULY 2021 - AUGUST 2021

- **Architected high-density, production-ready landing pages** using HTML5 and CSS Grid/Flexbox layouts, substantially driving mobile device accessibility and front-end cross-browser rendering accuracy.
- **Developed modular, cross-client HTML email architectures** for the Salesforce platform, systematically mitigating inline CSS parsing bugs to optimize delivery rates and user click-through engagement metrics.

SENIOR WEB DEVELOPER

TEA COLLECTION | FEBRUARY 2017 - JANUARY 2020

- **Collaborated asynchronously with cross-functional product, UX, and marketing teams** via Figma to translate high-fidelity blueprints into high-converting customer acquisition funnels and reusable UI components.
- **Deployed rigorous multi-variant A/B testing matrix structures** and integrated Google Tag Manager (GTM) telemetry layers to isolate user friction points, using data insights to drive multi-brand conversion rate optimization (CRO).
- **Championed continuous integration best practices**, scaling code velocity and repository health by implementing peer documentation loops, structured pull request validation strategies, and engineering mentorship frameworks.

WEB DEVELOPER (APPLEONE CONTRACT)

SAMTRANS & CALTRAIN | JUNE 2016 - DECEMBER 2016

- **Managed full-scale CMS operations and technical SEO architectures** across primary public transportation web properties, maintaining system uptime and search engine crawl visibility.
- **Coordinated the technical systems integration of complex Web Service infrastructure**, successfully streaming live GTFS transit data sets between internal district servers and the regional MTC/511 Transit Data Manager network.
- **Compiled pixel-perfect, accessible web layouts** directly from raw vector design mockups using clean, semantic web standards to ensure compliance with public sector accessibility guidelines.

WEB DEVELOPER (AQUENT CONTRACT)

COST PLUS WORLD MARKET | MARCH 2015 - NOVEMBER 2015

- **Deployed responsive UI layouts and promotional application modules** across primary enterprise e-commerce portals, corporate frameworks, and high-traffic blog assets.
- **Architected and extended custom enterprise WordPress themes** by writing clean, modular PHP server-side code hooks and JS overrides engineered to support backend infrastructure integrations and survive core platform updates.
- **Leveraged enterprise-tier CMS tools (MarketLive platform)** to orchestrate complex, time-sensitive promotional layout changes and dynamic asset displays under aggressive corporate deployment timelines.

EDUCATION

WEB DEVELOPMENT CERTIFICATION

Seattle Central College 2014
